Narco Tracker Platform
Healthcare Solutions

NarcoTrack

Product Overview

The Narco Tracker Platform is an advanced healthcare solution designed to transform how narcotic medications and controlled substances are managed, from importation through to end-use.

The platform focuses on enhancing efficiency, traceability, and compliance across the entire controlled medication lifecycle. With a strong emphasis on adaptability and innovation, it utilizes cutting-edge technology to meet the evolving demands of modern healthcare systems.

Its core mission is to elevate healthcare standards, ensure responsible medication management, and support overall societal well-being through smarter, more secure pharmaceutical processes.

Added Business Value

1. Strengthened Oversight of Medications and Prescriptions

2. Empowered Healthcare Professionals Through Innovation

3. Streamlined Task Management and Collaboration

4. Support for a Scalable, Future-Ready National Healthcare Strategy

5. Safer Medication Lifecycle Through Digital Modernization

6. End-to-End Compliance with Regulatory Standards

Solution Components

Outpatient Medication Management Module
Streamlines the prescribing and dispensing of medications for non-admitted patients, ensuring safe and accurate treatment outside healthcare facilities.

Inpatient Medication Management Module
Manages medication administration for hospitalized patients with full visibility into dosing schedules, prescription histories, and care coordination.

VET Management Module
Manages medication administration and dispensing for all animals, with full visibility into owners, dosing history, and care coordination.

Telemedicine Module
Enables remote consultation, prescription, and medication tracking with full visibility into patient history and seamless coordination across care teams.

Inventory & Stock Control Module
Provides real-time tracking and management of medication stock levels, expirations, and supply chain logistics to prevent shortages and ensure readiness.

Data Driven Insights empowered by AI
Provides real-time analytics and AI-powered predictions to optimize medication usage, detect risks, and enhance decision-making across all modules.
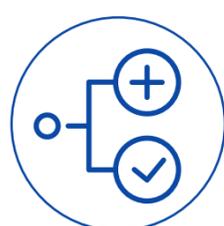

Key Features & Capabilities

System Integration: Connects seamlessly with healthcare facility systems and medication inventories.

Trusted Identity Verification: Integrates with accredited sources for identity and professional credentials.

Smart Decision Support: Enhances prescribing with global drug knowledge and clinical best practices.
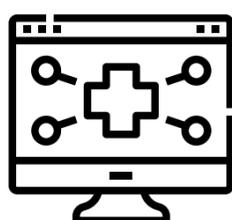

**Dynamic Rules Engine:** Automatically apply the latest compliance rules and regulatory updates.

Regulatory Compliance: Aligned with healthcare standards and GDPR data protection requirements.
