Identity & Access Management Solutions

One Pass

SOLUTION OVERVIEW

One Pass is a powerful Identity and Access Management (IAM) solution designed to ensure that the right individuals have access to the right resources, at the right time, and for the right reasons.

t manages the entire user lifecycle from onboarding to deactivation, verifying each user's identity and enforcing secure access through group-based, role-based, and permission-based controls.

With built-in support for industrystandard security policies and authentication protocols, One Pass strengthens organizational security, reduces risk, and streamlines access management across systems and platforms.

ADDED BUSINESS VALUE

Improved Security

Enforce consistent policies across all platforms, quickly detect risks, and manage privileges with greater control and visibility.

Reduced IT Costs

Eliminate the need for multiple credentials and complex integrations. Cloud-based setups reduce infrastructure and maintenance expenses.

Increased User & Admin Satisfaction

Simplified sign-in and access processes enhance the experience for both users and administrators, with less manual effort required.

Enhanced Productivity

Automate user lifecycle tasks like onboarding and role changes, reducing errors and saving valuable time.

SOLUTION
KEY FEATURES
& CAPABILITIES

Login Options

Control authentication and user access with dynamic password policies, token builders, and support for JWT/OAuth2 APIs, all from a central dashboard.

Identity Providers

Enable secure login through SAML, OpenID Connect, social accounts, and UAE PASS, offering flexible and familiar sign-in options.

Access Control

Manage access to applications and APIs using dynamic role-based authorization, with support for identity scopes and reference tokens.

Users

Monitor and manage users with full profile visibility, access levels, and quick actions like password resets and account blocking.

Workforce

Sync users with your Active Directory, handle provisioning or deprovisioning, and manage workforce identities securely and efficiently.

Requests Management

Simplify access requests with self-service workflows, custom approval paths, and automated provisioning integrated across your systems.

SOLUTION KEY FEATURES & CAPABILITIES

Multi-Factor Authentication (MFA)

Control authentication and user access with dynamic password policies, token builders, and support for JWT/OAuth2 APIs, all from a central dashboard.

Customization & White Labeling

Tailor One Pass to your brand with white labeled interfaces, custom email templates, and configurable SSO page design.

Notification Center

Keep users informed through email, SMS, or push notifications, with integration options like Cartero (Tahaluf Product) for tracking and delivery.

Single Sign-On (SSO)

Enable seamless access across multiple applications using one set of credentials, enhancing user convenience and reducing password fatigue.

Logs & Audit Trails

Track user activity and system events with built-in logging and audit capabilities for better visibility and compliance.

ABOUT US

At Tahaluf Al Emarat Technical Solutions, we specialize in delivering cutting-edge IT and cybersecurity solutions that empower businesses to thrive in a dynamic digital world. Since our founding in 2015 in Abu Dhabi, we've rapidly grown into a trusted name across the UAE and beyond.

Driven by innovation, expertise, and a passion for excellence, our team works closely with clients to enhance operational efficiency, ensure continuity, and create lasting value. With a strong focus on emerging technologies, we help organizations stay ahead of the curve while building a secure and sustainable future.
