

Visa Management System

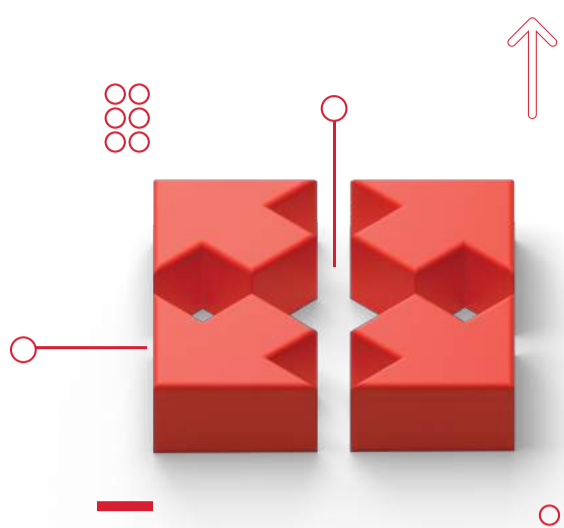

Product Overview

Over the years, the UAE government has strived to provide an adequate residency and visa system catering to the needs of its growing expat population and inbound visitors. Our Visa Management System is a nation-wide integrated platform implementing local residency and immigration rules and regulations, and offering multiple visa categories such as tourist visas, work visas, official missions, and other special permits.

The system supports the digital transformation of visa processes by aligning itself with immigration laws and business rules using a configurable rule engine and enabling integration with 3rd party systems such as the national security system, to deliver seamless processes to different stakeholders.

Benefits

With the successful implementation of Tahaluf Visa Management System, stakeholders have reported increased efficiency, optimal resource utilization, and increased productivity.

More particularly, they were able to:

Optimize operational costs

Reduce the number of employees required to manually process service applications

Reduce the number of technical and operational resources required to complete the process

Increase customer satisfaction

Reduce request auditing and processing time.

Implement an optimized service processing lifecycle from request submission to audit, and approvals

Improve quality and governance

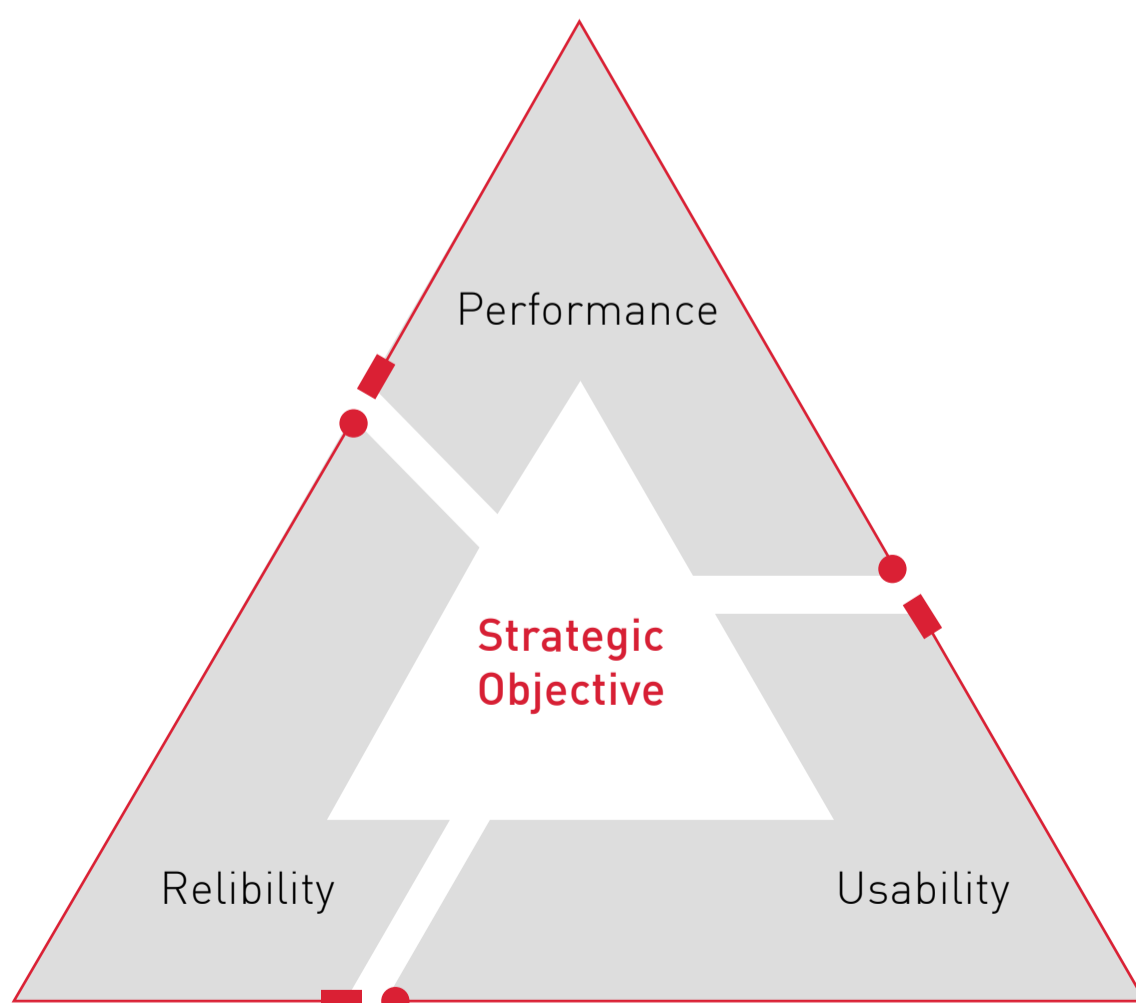

Reduce human errors through a fully automated process

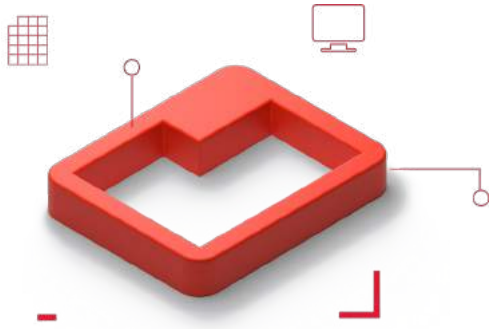

Access real-time reporting and dashboards

Provide an automatic quota and service fees refund for cancelled or rejected applications

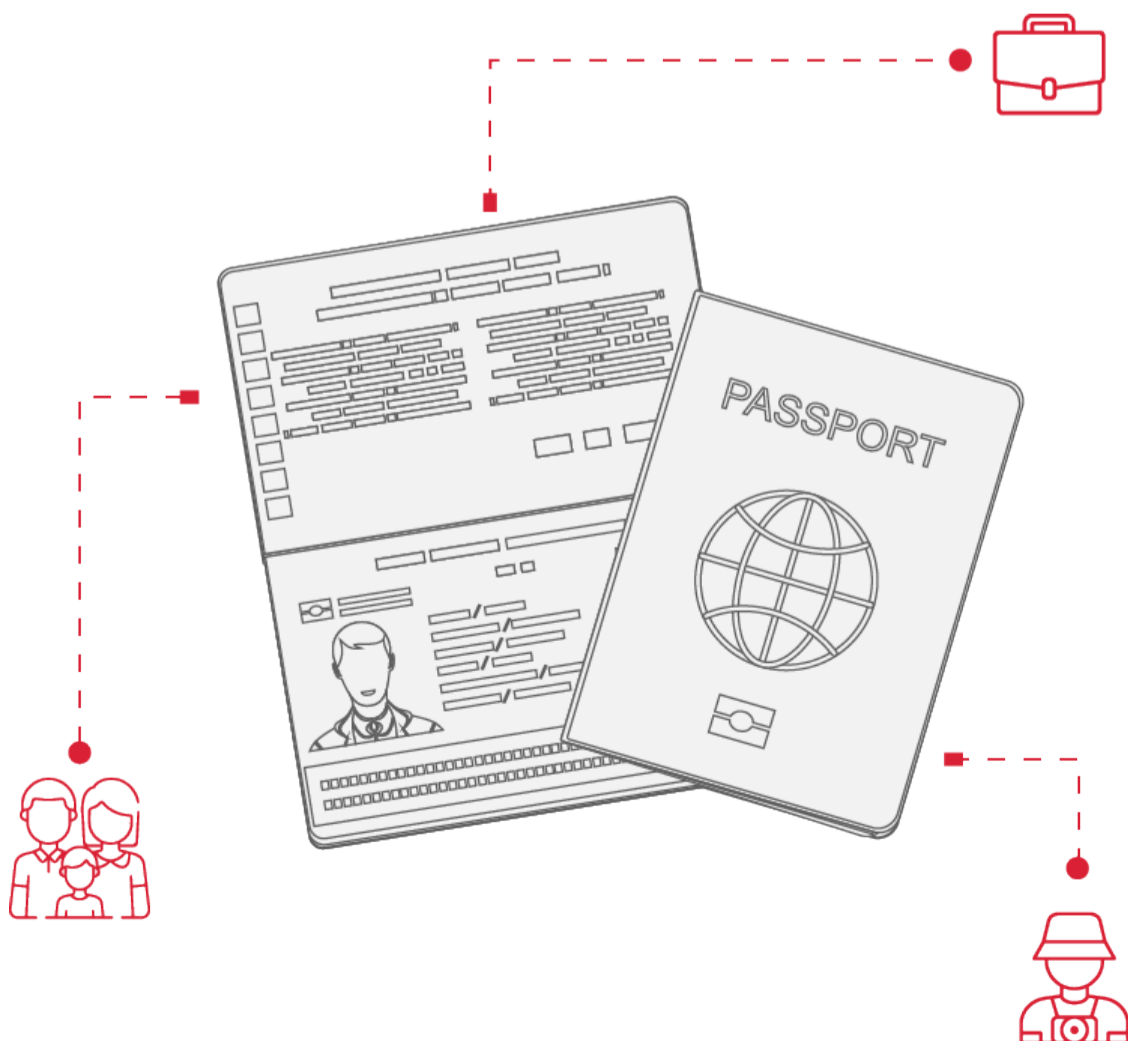

Modules
